	ATK	HIT	DMG	WR
Tail blade	4	3+	3/4	Range 3", Rending, Silent
Scything talons & rending claws	5	3+	4/5	Rending

Neuropredatory Crest: Whenever determining control of a marker, treat the total APL stat of enemy operatives that contest it as 1 lower if at least one of those enemy operatives is within 3" of this operative. Note this isn't a change to the APL stat, so any changes are cumulative with this. Whenever an enemy operative is within 3" of this operative:

- Your opponent must spend 1 additional AP for that enemy operative to perform the **Pick Up Marker** and mission actions.
- Your opponent cannot re-roll their attack or defence dice for that operative.

Synaptic Link: STRATEGIC GAMBIT If this operative isn't incapacitated. Roll one D6 and compare the result to the number of the current turning point; if the result is:

- Higher: you gain 1CP.
- Equal: nothing happens.
- Less: inflict damage on this operative equal to the result.

NAME

	ATK	HIT	DMG	WR
Pincer tail	4	3+	3/4	Range 3", Silent
Scything talons & rending claws	5	3+	4/5	Rending

Subterranean Ambush: Once per turning point, after an enemy operative performs an action in which it moves more than 2" and ends within 2" of your **TUNNEL**, if this operative is underground and is either ready or hasn't counteracted during this turning point, you can interrupt that enemy operative's activation/counteraction to use this rule.

If you do, activate or counteract with this operative (as appropriate), but during its activation/counteraction it must fight against or shoot against that enemy operative, and cannot do so against any other enemy operatives until it does (if this isn't possible, this operative's activation/counteraction is cancelled and this rule hasn't been used). After completing this operative's activation/counteraction, continue that enemy operative's activation/counteraction (if possible).

Hypersensory Hunter: This operative can perform the **Charge** action while it has a Conceal order if it performed the **Burrow** action during the same activation/counteraction.

(40)

NOTES:

NOTES:

RAVENERS KILL TEAM

ARCHETYPES: INFILTRATION, SEEK & DESTROY

OPERATIVES

- ↳ 1 RAVENERO PRIME operative
- ↳ 4 RAVENERO operatives selected from the following list:
 - FELLTALON
 - TREMORSCYTHE
 - VENOMSPITTER
 - WARRIOR
 - WRECKER

Other than **WARRIOR** operatives, your kill team can only include each operative on this list once.

RAVENERO FACTION RULE

BURROW

Raveners will emerge from their tunnels to strike at unsuspecting victims, then disappear again before their foe can properly react.

When setting up a RAVENERO kill team before the battle, your first two operatives must be set up as normal. Each other friendly RAVENERO operative thereafter can be set up underground: place it to one side instead of in the killzone.

In the Firefight phase, friendly RAVENERO operatives set up underground are activated and can counteract as normal. Whenever a friendly RAVENERO operative is underground, it cannot perform any actions other than Burrow. At the end of the battle, each friendly RAVENERO operative that's underground is incapacitated.

CONTINUES ON OTHER SIDE ►

Friendly RAVENERO operatives can perform the following unique action:

BURROW

1AP

- If this operative is underground, set it up on your TUNNEL in a location it can be placed (it's no longer underground, and it can be set up within control range of enemy operatives). Until the end of the activation/counteraction, subtract 2" from its Move stat.
- Alternatively, instead of resolving the above effect, if this operative is in the killzone and on your TUNNEL, remove it from the killzone: it's now underground.
- ◆ An operative cannot perform this action while carrying a marker, or if it isn't either underground or on your TUNNEL.

RAVENERO FACTION RULE

TUNNEL

Raveners dig extensive tunnel networks in the ground and foundations beneath their prey's feet, enabling the Hive Mind's elite creations to outmanoeuvre and ambush their prey.

At the end of the Set Up Operatives step, place your Tunnel marker numbered '0' on the killzone floor, wholly within your drop zone and touching your killzone edge. As a STRATEGIC GAMBIT in the first four turning points, you can place your next numbered Tunnel marker on the killzone floor wholly within 5" of your preceding Tunnel marker (in Killzone: Gallowdark, this distance can be measured through Wall terrain). This means that, as the battle progresses, you can have a series of sequentially numbered Tunnel markers (0, 1, 2, 3 and 4). Once you have placed five Tunnel markers, don't place any more (i.e. if your battle lasts more than four turning points).

CONTINUES ON OTHER SIDE ►

Your Tunnel markers and the area between your sequentially numbered markers (i.e. between 0 and 1, 1 and 2, etc.), create your **TUNNEL**.

In a killzone that uses the hazardous areas rules (e.g. Killzone: Bheta Decima), for the purposes of the Restricted Movement rule, parts of a Tunnel marker that are touching a hazardous area are treated as a hazardous area.

In this example, operative A is on your **TUNNEL** as it's on the area between markers 0 and 1. Operative B is also on your **TUNNEL** as it's touching one of your Tunnel markers. Operative C is not on your **TUNNEL** as markers 1 and 3 are not sequential, so the area between those markers is not part of your **TUNNEL**.

RAVENERO® FACTION RULE

PREDATORY INSTINCTS

Seemingly driven by an all-consuming hunger, and with hyper-adapted reflexes, Raveners are deadly blurs of muscle, talons and fangs.

During each friendly **RAVENERO®** operative's activation, it can perform two **Fight** actions.

Each friendly **RAVENERO®** operative can counteract regardless of its order. Whenever it does:

- You can change its order first, or change its order instead of performing an action (for the latter, still treat it as having counteracted this turning point).
- During that counteraction, if it doesn't perform a mission action it can perform a free **Burrow** action.

RAVENERO® MARKER/TOKEN GUIDE

Poison token

Subterranean Ambush token

Distend Dorsal Sac token

Heightened Senses token

Tunnel markers

RAVENERO® STRATEGY PLOY

DEATH FROM BELOW

Spurred by an imperative from the Hive Mind, Raveners will coordinate lunges from the depths of their tunnel network to eviscerate unwary prey that have strayed too close.

Whenever a friendly **RAVENERO®** operative is fighting:

- If it's performed the **Burrow** action during that activation/counteraction, its melee weapons have the **Balanced** weapon rule.
- If it's on your **TUNNEL**, its melee weapons have the **Ceaseless** weapon rule.

RAVENERO[®] STRATEGY PLOY

WHIPCORD EMERGENCE

Whether lunging from a rubble-strewn entrance to their network of tunnels or bursting forth in a shower of debris to snatch at prey, Raveners can surprise even elite sentinels.

Whenever an operative is shooting a friendly RAVENERO[®] operative:

- If that friendly operative has performed the **Burrow** action during that turning point, you can re-roll one of your defence dice.
- If that friendly operative is on your **TUNNEL**, you can re-roll any of your defence dice.

RAVENERO[®] STRATEGY PLOY

WRITHE OUT OF SIGHT

Few organisms are as capable of slithering away into darkness in the blink of an eye as Raveners. The question then is, where did they go...?

Select one friendly RAVENERO[®] operative. That friendly operative can immediately perform a free **Burrow** action. If it's within 2" of your **TUNNEL**, it can immediately perform a free **Fall Back** or **Reposition** action before it does so.

RAVENERO[®] STRATEGY PLOY

TUNNEL LURKERS

Raveners are horrifically adept at remaining all but invisible, partially submerged amidst broken terrain, until the moment they lunge.

Whenever a friendly RAVENERO[®] operative is on your **TUNNEL** it's in cover, unless it's within 2" of the active operative. Treat this as cover provided by Light terrain (therefore it's affected by rules that prevent this, e.g. Seek Light and Vantage terrain).

RAVENERO[®] FIREFIGHT PLOY

SLITHERING EVASION

The secretion-slick carapace and unholy speed of a Ravener enables them to avoid becoming bogged down against dangerous prey.

Use this firefight ploy during a friendly RAVENERO[®] operative's activation or counteraction, before or after it performs an action. During that activation/counteraction, that operative can:

- Perform the **Fall Back** action for 1 less AP.
- Perform the **Charge** action while within control range of an enemy operative, and can leave that operative's control range to do so (but then normal requirements for that move apply).

RAVENERO[®] FIREFIGHT PLOY

SUBTERRANEAN HORROR

Those who think to trap a Ravener by tackling it at its brood burrow invite only their own demise, as the bioform uses hidden tunnels to encircle its prey before striking from an unexpected angle.

Use this firefight ploy when an enemy operative is performing the **Fight** action and selects a friendly **RAVENERO[®]** operative on your **TUNNEL** to fight against. In the Resolve Attack Dice step of that sequence, you resolve the first attack dice (i.e. defender instead of attacker).

RAVENERO[®] FIREFIGHT PLOY

BURROWING STRIKE

The last sight for many operatives fighting Raveners is a blur of their own uniform as they disappear into the depths of a xenos burrow.

Use this firefight ploy when a friendly **RAVENERO[®]** operative performs the **Burrow** action. Before that operative is removed from the killzone, or after setting it up on your **TUNNEL**, inflict D3+1 damage on each enemy operative within its control range (roll separately for each). You cannot use this ploy in the Strategy phase, or during a **FELLTALON** operative's activation or counteraction if it performs the **Toxic Lunge** action (and vice versa).

RAVENERO[®] FIREFIGHT PLOY

DEATH FRENZY

Ravengers can be compelled by the Hive Mind to fight in a last surge of biostimulated aggression, even as their own bodies fail.

Use this firefight ploy when a friendly **RAVENERO[®]** operative is incapacitated. Before that operative is removed from the killzone, inflict D3 damage on each enemy operative within its control range (roll separately for each). If that friendly operative is a **VENOMSPITTER** that's currently benefitting from the effects of its **Distend Dorsal Sac** action, inflict 2D3 damage instead.

RAVENERO[®] FACTION EQUIPMENT

CHROMATOSPORE CAMOUFLAGE

Chameleonic adaptations enable these bioforms to virtually disappear.

Whenever an operative is shooting a friendly **RAVENERO[®]** operative, if you can retain any cover saves, you can retain one additional cover save. This isn't cumulative with improved cover saves from Vantage terrain.

RAVENERO FACTION EQUIPMENT

ACID BLOOD

Corrosive viscera and caustic fluids spray from these creatures' wounds.

Whenever a friendly RAVENERO operative is fighting or retaliating, whenever an attack dice inflicts damage on it, roll one D6: on a 5+, inflict 1 damage on the enemy operative in that sequence.

RAVENERO FACTION EQUIPMENT

METAMORPHIC FLESH

Some Ravens are reported to have recovered from injuries that should have been fatal, their flesh and chitin reknitting in rapid regeneration.

Whenever a friendly RAVENERO operative is activated, it regains up to D3 lost wounds.

RAVENERO FACTION EQUIPMENT

HEIGHTENED SENSES

Even burrowing, Ravens can detect enemy pheromones, esoteric energies and the whirr of servos, enabling them to lay sudden ambushes.

Once per battle, after rolling off to decide initiative, if a friendly RAVENERO operative is underground and an enemy operative is within 5" of your TUNNEL, you can re-roll your dice.

UNIVERSAL EQUIPMENT

1X AMMO CACHE

Whether stockpiles deliberately set out for warriors to access quickly, or the abandoned munitions of the slain, these caches can prove vital for a swift reload in the heat of battle.

Before the battle, you can set up one of your Ammo Cache markers wholly within your territory. Friendly operatives can perform the following mission action during the battle.

AMMO RESUPPLY

OAP

- One of your Ammo Cache markers the active operative controls is used during this turning point.
- Until the start of the next turning point, whenever this operative is shooting with a weapon from its datacard, you can re-roll one of your attack dice.
- ◆ An operative cannot perform this action while within control range of an enemy operative, if that marker isn't yours, or if that marker has been used this turning point.

UNIVERSAL EQUIPMENT

1X RAZOR WIRE

Spoiled rapidly out and affixed to jutting posts, razor wire acts as an easily deployed barrier and a painful deterrent to enemy operatives seeking to attack along particular routes.

Razor wire is Exposed and Obstructing terrain. Before the battle, you can set it up wholly within your territory, on the killzone floor and more than 2" from other equipment terrain features, access points and Accessible terrain.

Obstructing: Whenever an operative would cross over this terrain feature within 1" of it, treat the distance as an additional 1".

UNIVERSAL EQUIPMENT

1X COMMS DEVICE

Communications devices can be swiftly hijacked and employed to coordinate operations or call in support during a firefight.

Before the battle, you can set up one of your Comms Device markers wholly within your territory. While a friendly operative controls this marker, add 3" to the distance requirements of its **SUPPORT** rules that refer to friendly operatives (e.g. 'select one friendly operative within 6"' would be 9" instead). Note that you cannot benefit from your opponent's Comms Device markers.

UNIVERSAL EQUIPMENT

1X MINES

The battlefields of the 41st Millennium are plagued by myriad types of mine, from simple frag charges to monofilament web-snare and microplasma charges. Ultimately, all serve a similar, horrible purpose.

Before the battle, you can set up one of your Mines markers wholly within your territory and more than 2" from other markers, access points and Accessible terrain. The first time that marker is within an operative's control range, remove that marker and inflict D3+3 damage on that operative.

UNIVERSAL EQUIPMENT

2X LIGHT BARRICADES

Designed to be lugged into place and then deployed by operatives and combat engineers, these barriers are proof against small arms fire.

Light barricades are Light terrain, except the feet, which are Insignificant and Exposed. Before the battle, you can set up any of them wholly within your territory, on the killzone floor and more than 2" from other equipment terrain features, access points and Accessible terrain.

1X HEAVY BARRICADE

A redoubtable slab of plasteel and adamantine, this layered protective barrier provides shelter amidst the fiercest firefights.

A heavy barricade is Heavy terrain. Before the battle, you can set it up wholly within 4" of your drop zone, on the killzone floor and more than 2" from other equipment terrain features, access points and Accessible terrain.

UNIVERSAL EQUIPMENT

2X LADDERS

Carried into battle in their compacted forms, these ladders provide a rapid route of ingress to strongholds, or access to vital vantage points.

Ladders are Exposed terrain. Before the battle, you can set up any of them as follows:

- Wholly within your territory.
- Upright against terrain that's at least 2" tall.
- More than 2" from other equipment terrain features.
- More than 1" from doors and access points.

In addition, an operative can either move through ladders as if they aren't there (but cannot finish on them), or climb them. Once per action, whenever an operative is climbing this terrain feature, treat the vertical distance as 1". Note that if an operative then continues climbing another terrain feature during that action (including another ladder), that distance is determined as normal.

UNIVERSAL EQUIPMENT

UTILITY GRENADES

From neuro-suppressant psybombs to smoke-belching chemical charges, grenades of this sort can suppress the enemy and be the difference between life and death.

When you select this equipment, select two utility grenades (2 smoke, 2 stun, or 1 smoke and 1 stun). Each selection is a unique action your operatives can perform, but your kill team can only perform that action a total number of times during the battle equal to your selection.

STUN GRENADE

1AP

- Select one enemy operative visible to and within 6" of this operative. That operative and each other operative within 1" of it takes a stun test. For an operative to take a stun test, roll one D6: on a 3+, subtract 1 from its APL stat until the end of its next activation.
- ◆ An operative cannot perform this action while within control range of an enemy operative, or if you have reached the total number of times your kill team can perform it.

UNIVERSAL EQUIPMENT

EXPLOSIVE GRENADES

A variety of offensive grenades are employed by the forces of the 41st Millennium. These range from simple fragmentation grenades to plasma and gravitic concussion grenades, while even more exotic devices are used to crack open enemy armour.

When you select this equipment, select two explosive grenades (2 frag, 2 krak, or 1 frag and 1 krak). Each selection is a ranged weapon your operatives can use, but your kill team can only use that weapon a total number of times during the battle equal to your selection.

NAME

ATK HIT DMG

☰ Krak grenade

4 4+ 4/5

WR

Range 6", Piercing 1, Saturate

UNIVERSAL EQUIPMENT

1X PORTABLE BARRICADE

Little more than a suppression shield with armoured feet, these barricades can be hefted and borne forwards to provide mobile cover.

A portable barricade is Light, Protective and Portable terrain. Before the battle, you can set it up wholly within your territory, on the killzone floor and more than 2" from other equipment terrain features, access points and Accessible terrain.

Protective: While an operative is in cover from this terrain feature, improve its Save stat by 1 (to a maximum of 2+).

RULE CONTINUES ON OTHER SIDE ►

Portable: This terrain feature only provides cover while an operative is connected to it and if the shield is intervening (ignore its feet). Operatives connected to the inside of it can perform the following unique action during the battle.

MOVE WITH BARRICADE 1AP

- The same as the **Reposition** action, except the active operative can move no more than its Move stat minus 2" and cannot climb, drop, jump or use any kill team's rules that remove it and set it back up again (e.g. **HEARTKYN SALVAGER**, **FLY, MANDRAKE**, **SHADOW PASSAGE**).
 - Before this operative moves, remove the portable barricade it's connected to. After it moves, set up the portable barricade so it's connected again, but the portable barricade cannot be set up within 2" of other equipment terrain features, access points or Accessible terrain. If this is not possible, the portable barricade is not set up again.
 - ◆ This action is treated as a **Reposition** action. An operative cannot perform this action while within control range of an enemy operative, or during the same activation in which it performed the **Fall Back** or **Charge** action.

SMOKE GRENADE 1AP

- ▶ Place one of your Smoke Grenade markers within 6" of this operative. It must be visible to this operative, or on Vantage terrain of a terrain feature that's visible to this operative. The marker creates an area of smoke 1" horizontally and unlimited height vertically from (but not below) it.
 - ▶ While an operative is wholly within an area of smoke, it's obscured to operatives more than 2" from it, and vice versa. In addition, whenever an operative is shooting an enemy operative wholly within an area of smoke, ignore the Piercing weapon rule unless they are within 2" of each other.
 - ▶ In the Ready step of the next Strategy phase, roll one D3. Remove that Smoke Grenade marker after a number of activations equal to that D3 have been completed or at the end of the turning point (whichever comes first).
 - ◆ An operative cannot perform this action while within control range of an enemy operative, or if you have reached the total number of times your kill team can perform it.

UNIVERSAL EQUIPMENT

UTILITY GRENADES

From neuro-suppressant psybombs to smoke-belching chemical charges, grenades of this sort can suppress the enemy and be the difference between life and death.

When you select this equipment, select two utility grenades (2 smoke, 2 stun, or 1 smoke and 1 stun). Each selection is a unique action your operatives can perform, but your kill team can only perform that action a total number of times during the battle equal to your selection.

RULE CONTINUES ON OTHER SIDE

NOTES:

RAVENERS: UPDATE LOG

Rules will be periodically updated to maintain fair balance and interact more smoothly with the game. Rules changes will be updated directly into online documents and then listed below. Any minor changes to standardise wording that don't have any practical impact on the rule will be updated directly into online documents but not be listed here.

ERRATA

This section collects amendments to the rules. Amended text for clarification and edits are shown in blue, while amended text for balance updates are shown in magenta.

FACTION RULES, BURROW, BURROW ACTION

Condition changed to read:

'An operative cannot perform this action while carrying a marker, or if it isn't either underground or on your TUNNEL.'

RULES COMMENTARY

This section provides clarification on ambiguous and complex rules interactions.

Q: Are RAVENER® operatives underground considered 'in the killzone' for the second victory points paragraph of the Implant tac op?

A: Yes. Note that other tac ops (e.g. Surveillance) would still require those operatives to be in the killzone.

Q: Can an expended friendly TREMORSCYTHE operative counteract to interrupt an enemy operative's activation with the Subterranean Ambush rule if there are still other ready friendly RAVENER® operatives?

A: Yes.

FIREFIGHT PLOYS, SLITHERING EVASION

First sentence changed to read:

'Use this firefight ploy during a friendly RAVENER® operative's activation or counteraction, before or after it performs an action.'

AUGUST '25

TREMORSCYTHE OPERATIVE, SCYTHING TALONS WEAPON

Name changed to 'Scything talons & rending claws'.

'Rending' weapon rule added.

VENOMSPITTER OPERATIVE, DISTEND DORSAL SAC ACTION

Relevant part of effect changed to read:

'Until this operative has shot with its venom bolt, until it performs this action again or until it performs the Burrow action [...]'

AUGUST '25

Q: When my TREMORSCYTHE operative interrupts my opponent's activation, if the enemy operative is incapacitated (and therefore its activation cannot be continued), who activates next? Equally, if it isn't incapacitated and then continues its activation, who activates next?

A: Your opponent in both cases, as the TREMORSCYTHE operative has used your activation.

PREVIOUS ERRATAS

RAVENER OPERATIVES

PRIME

1

FELLTALON

VENOMSPITTER

Ravener Primes act as a nodal hub for their brood. Via their neuropredatory crests, the Hive Mind's influence spreads to nearby Raveners, overriding their instincts and coordinating their behaviours to its alien design.

The virulent toxins that seep from a Felltalon's claws turn their victims' bodies into sites of xenos infection. Those who somehow survive and escape unwittingly leave a trail of pathogens the Felltalon can track.

A Venomspitter has been adapted by the Hive Mind to carry sac-like nodules that produce a ferocious toxin. From modified jaws, it can project gobbets of it at considerable distance to douse enemy positions in the venomous ooze.

Ravener kill teams are hyperadapted to such an extent that they are able to overcome all manner of a prey species' defences. Driven by alien synaptic imperatives, Raveners burrow with horrific speed to strike at prey from vulnerable angles, before using razor-sharp talons, chitinous claws and virulent biotoxins to enact the Hive Mind's will.

WRECKER

TREMORSCYTHE

WARRIOR

2

With increased muscle mass, thickened carapaces and oversized claws, Wreckers are a living weapon the Hive Mind uses to break into reinforced holdouts, armoured vehicles or bunkers, tearing apart anything hiding inside.

The nerve clusters that fill their hypersensory array enable Tremorscythes to detect not only prey movements but also energy blooms, comms bursts and the minute chemical signatures that betray their victim's fear.

With predatory instincts, hyperadapted strength and razor-sharp talons, these burrowing horrors are amongst the galaxy's greatest shock troops, propelled by the fathomless alien intellect of the Hive Mind.

RAVENERS KILL TEAM

Below you will find a list of the operatives that make up a **RAVENERS** kill team, including, where relevant, any weapons specified for that operative.

OPERATIVES

DESIGNER'S COMMENTARY

5

Raveners are a truly elite team with some powerful individual rules, but they can be unforgiving if you are too aggressive or make a mistake. They can threaten anyone anywhere, but with just a 5+ Save stat, they can't stand up to a focused attack. You'll need to utilise all their rules to ensure you're the hunter and not the hunted.

As the battle progresses, you'll build a tunnel from which Raveners can emerge using the Burrow faction rule. This gives you an incredible threat range in the mid-to-late stages of the battle, but is telegraphed; your opponent will know where your Raveners can emerge from and can position their operatives appropriately – a canny opponent will even set up bait with an expendable operative to draw your Raveners out. Therefore, be cautious when deciding when to emerge – you don't always have to charge headlong into the enemy! The threat of your underground Raveners is often enough to force your opponent to be cautious, then you can emerge when the payoff is high.

Alongside emerging, the Burrow action can be used to allow your Raveners to disappear back underground, getting them to safety after a big play or allowing them to manoeuvre to a different area of the killzone. This will be essential for keeping your Raveners alive – the Burrow action is just as important for disappearing as it is for emerging. Remember, you can't do both in the same activation, but you can disappear during a counteract or the Writhe out of Sight strategy ploy.

Pairing the Burrow action with the Predatory Instincts faction rule maximises your action output and gives you ways to threaten beyond just the five early activations of your Raveners. For example, an underground operative can counteract, burrow and charge to set up in a safe but aggressive position for the next turning point, or a Venomspitter can counteract, change to engage, shoot, then burrow away to safety. There's a lot of combos the Burrow action provides, especially when you factor in counteracting, so use it to keep your opponent on the back foot and unable to react to your plays.

Early in the game, when an underground Ravener is activated, don't be afraid to pass on actions and leave them underground waiting. Against most teams, your opponent will often activate less-important operatives just to see when and where your Raveners will emerge, then counterattack them. There's no point emerging for little gain just to see your operative be out of position for a more important play, or take damage when your opponent does counterattack.

This is particularly important because this team doesn't trade well. This means it's often not worth a Ravener incapacitating one enemy operative if your opponent could then incapacitate that Ravener. At just five operatives, losing one for one can be too costly. Try to incapacitate enemies in a safe manner, particularly if you can burrow away after or safely stay within control range of an expended enemy operative. This can narrow the operative deficit early on, then allow you to apply pressure when your opponent is running out of ways to react.

Calling out some operatives' important rules, the Prime is great for messing with your opponent's control on a key marker, the Felltalon's Toxic Lunge action is useful for low-risk chip damage (especially if they're performing the action when underground), and the Tremorscythe elevates the threat of ambush to the next level thanks to its Subterranean Ambush rule. The Wrecker is your most durable operative, and also the best equipped for fighting tough melee operatives thanks to the extra damage from its Crush weapon rule. Finally, your Venomspitter is your only dedicated ranged weapon specialist, so use it wisely – it can shoot at an enemy operative your other operatives can't reach, and the threat of it doing so can be used to keep enemy operatives' heads down!

Raveners are a team with some truly scary potential, but if you're too aggressive and your opponent keeps calm, you may find your Raveners losing steam once they're all out in the open and vulnerable to enemy counterattacks. Use them carefully, like lurking predators with the intelligence of the Hive Mind, and you'll see them reach their highest potential.
